

# Advancing awareness of reproductive and genetic health

At Illumina, we strive to advance awareness of genetics and health. We're committed to partnering with professional societies and organizations in order to achieve our goal. Together, we're able to provide health care professionals with accurate, unbiased, and balanced information and education.

## Explore the resources below to gain valuable insights

Perinatal Quality Foundation/Genetic Education Modules (GEM)—This subscription provides interactive educational videos and decision-making tools on prenatal screening and testing options for both health care providers and patients.

[gem.perinatalquality.org](http://gem.perinatalquality.org)

American Society of Human Genetics (ASHG)—Genetic education resources including a webinar series, a guide to interpreting genomic test results, and virtual meetings designed for health care providers, who are not necessarily genetics specialists.
