

# Illumina's Climate Change Position Statement

Illumina's Corporate Social Responsibility vision is to deepen our impact on human health by serving as a champion for patients, the community, and our planet. We are committed to integrating environmental stewardship into the fabric of how we operate. We recognize the risk posed by global climate change and importance of our environment in creating a healthy, sustainable future for all.

Illumina supports the conclusions of international frameworks that address climate change and the conclusions from the Intergovernmental Panel on Climate Change (IPCC). We acknowledge the need to keep the global temperature rise to well below 1.5 degrees Celsius to avoid consequences to human health and wellbeing. We endorse the use of scientific consensus and science-based targets to address carbon emissions reduction efforts.

We have committed to:

- Business Ambition for 1.5 degrees Celsius
- Science Based Targets initiative
- We Mean Business Coalition
- United Nations Race to Zero
- United Nations Sustainable Development Goal 13 to take action on climate change
- Task Force on Climate Disclosure

We believe all governments and businesses have important roles and responsibilities to address the issue of Climate Change, and we will continue to seek opportunities to do our part to achieve this critical goal. We have joined other corporate leaders in committing to decarbonization and demonstrating our commitment to leadership in environmental sustainability.

Illumina has created a Climate Action Plan outlining targets associated with Net Zero emissions across our direct operations and value chain, increased renewable electricity use, water conservation, landfill waste diversion, green design in new construction, and integrating Design for the Environment into new product design.

We are committed to measuring our progress and reporting to stakeholders in a timely and transparent way through our annual Corporate Social Responsibility Report and CDP disclosures.

At Illumina, we are committed to operate responsibly and sustainably and aim to help shape a more sustainable and equitable future for all.
